Kolkata, West Bengal | +91-8670900329 | abhijeetsinha2025@gmail.com | portfolio | [github](#) | [linkedin](#)

PROFILE

Detail-oriented Data Analyst skilled in SQL, Python, Power BI, and Excel for data cleaning and KPI dashboarding. Combines AI analytics certification with a customer support background to deliver clear, actionable stakeholder insights.

EXPERIENCE

Process Associate | Teleperformance

Kolkata, India | Sep 2023 – Feb 2025

- Managed Amazon logistics support tickets, coordinating with delivery partners to resolve operational issues efficiently.
- Maintained and validated operational data in Excel, ensuring accuracy and compliance with process guidelines.
- Prepared daily performance reports and tracked key metrics to support team operations and management review

Frontend Web Developer | Freelance Collaboration

Kolkata, India | Aug 2021 – Jul 2023

- Developed responsive web interfaces using HTML, CSS, and JavaScript to enhance user experience across devices.
- Collaborated with backend developers to integrate frontend components and functionality.
- Designed and optimized reusable UI components, improving website performance and maintainability.

EDUCATION

Brainware Group of Institution-SDET

Kolkata, India

Bachelor of Technology in Electronics and Communication Engineering

2017 – 2021

SKILLS

Data Analytics: SQL, Excel, Power BI, Data Cleaning, Data Validation, KPI Reporting, Business Reporting, Dashboard Development

SQL: Joins, Aggregations, CTEs, Window Functions, Views, Subqueries

Python: Pandas, NumPy, Matplotlib, Seaborn, EDA, basic visualization

Excel: Pivot Tables, VLOOKUP, HLOOKUP, XLOOKUP, Power Query, Conditional Formatting

Tools: MySQL, Power BI, Excel, GitHub

AI Tools: ChatGPT, Claude, Gemini, Perplexity

CERTIFICATIONS

- Certified Data Science Professional | Odin School | Dec 2025 ([link](#))
- AI-Powered Data Analytics | CodeWithHarry | Apr 2026 ([link](#))

PROJECTS

Gurgaon Real Estate Market Analysis | Python, Pandas, Matplotlib, Seaborn, Power BI | May 2026 ([link](#))

- Cleaned and analysed 19,515 Gurgaon property records, preparing a final dataset of 14,223 records across 244 localities for real estate market analysis.
- Performed EDA and built an interactive Power BI dashboard to compare pricing trends by locality, builder, BHK count, property status, RERA approval, and rate per sqft.

Customer Churn Analysis | Python, SQL, Pandas, Seaborn | May 2026 ([link](#))

- Analysed 7,032 IBM Telco customer records across 21 features to identify churn patterns by contract type, tenure, payment method, and monthly charges.
- Cleaned and explored customer data using SQL and Python, finding a 26.58% churn rate and identifying high-risk segments such as month-to-month, fiber optic, and electronic check users.

Banking Transaction Analytics & Fraud Detection | MySQL, Python | Jun 2026 ([link](#))

- Designed and analysed a 6-table relational banking database containing 10,000 transactions, 1,000 customers, 25 branches, 400 loans, and 250 fraud flags.
- Used MySQL joins, aggregations, window functions, and views to analyse transaction patterns, customer activity, loan data, and fraud indicators.
